I want to take up the post of Web-developer. I expect for interesting and difficult tasks with the possibility of maximum development and self-realization.

My advantages are the desire for self-development, the desire to radically disassemble every technology I study, and the love for writing the code.

## Skills:

- HTML5 - semantic, cross-browser and valid code - 1 year experience
- CSS3 - transformation, animation, Flexbox, Grid System - 1 year experience
- Javascript (ES5, ES6) - closures, OOP, DOM API, async programming, best practices - 1 year experience
- Vue.js - 1 year experience
- PHP, MySQL - 1 year experience
- Preprocessors SCSS, LESS, Pug
- base knowledge of React.js
- HTTP, AJAX, CORS
- Automate the project with Webpack
- CVS: Git
